

Fiber Optic Coils

Customised Length of Single Mode or Multi Mode fiber is coiled with low stress & tension on a stranded spool or customised spool. Both fiber end can be terminated or bare fiber also can be supplied.

Customised lengths for 0.1 KM to 5 KM as per ID, OD & height will be customised with low attenuation & easy assembly.

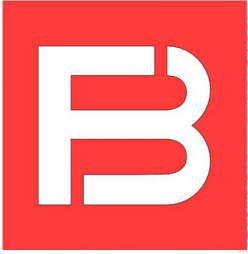

Applications:

- Optical Delay Lines.
- Optical tests.
- OTDR calibrations.
- Launch test cables.
